PROFILE

Highly motivated computer science student with a strong foundation in Java development and object-oriented programming. Currently pursuing a second bachelor's degree in Computer Science, building on a previous academic background in physics. Experienced in Java development, with knowledge of the Spring framework and a deep interest in backend development and software engineering.

SKILLS

Programming Languages

Java
JavaScript(and HTML, CSS)
Python(PyTorch, NumPy,
Pandas, Scikit-learn,
Matplotlib, Spacy, ...)

Database

MySQL
MongoDB
PostgreSQL

Version Control

Git, GitHub

Software

Docker, Kubernetes
RESTful API
Microservices

EDUCATION

BACHELORS IN COMPUTER SCIENCE

2023 - 2026

Amirkabir University of Technology(Tehran Polytechnic)

PROJECTS

Store Management Application [On GitHub](#)

Skills: Java, SQL, Swing, AWT

- Developed a desktop application for managing store inventory, sales, and customer data using Java's Swing and AWT libraries for the user interface.
- Integrated SQL for efficient data

RSS Reader Application [On GitHub](#)

Skills: Java, JSoup

- Developed a RSS reader application to manage and track multiple RSS feeds.
- Implemented features to add and remove feeds, and display recent posts using the JSoup library for extracting RSS data from websites.

Image Viewer Application [On GitHub](#)

Skills: Java, Swing, AWT

- Created a GUI-based image viewer allowing users to load and edit images.
- Used Java's Swing and AWT libraries to provide a seamless, interactive user experience.
- Implemented file handling functionality to allow users to select and manipulate images directly from their system.

ATM Application [On GitHub](#)

Skills: Java, Swing, AWT

- Designed and implemented an ATM system using Java's Swing and AWT libraries for a user-friendly graphical interface.
- Integrated robust error handling to ensure data security and smooth user experience throughout transactions.
